Title: Facilitating Representation of African Americans and Native Americans in

Wendy Williams

Genomics-Related Research

Goal: The purpose of these mixed-methods multiphase studies is to explore factor associated with the under representation of African Americans and Native Americans in genetic/genomic research and to increase the participation of African Americans and Native Americans in genetics and genomics focused research, and thereby increase the validity and reliability of epidemiological studies and ensure that the unique polymorphisms are appropriately addressed in future treatment modalities.

Role: Consultant / Co- Investigator (Gene Matters Community Based Participatory Research Advisory Committee) - Vanessa Johnson, OUHSC College of Nursing – Principal Investigator
